### **DETAILED ACTION**

Claims 1-7, 9-15 and 17-34 are currently presented and have been examined.

#### ***Response to Arguments***

Applicant's arguments with respect to claims 1-7, 9-15, and 17-34 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-7, 9-15 and 17-34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1-7, 9-15 and 17-34 recite registering a target with a server behind a firewall. This limitation was not described in the specification in order to enable one skilled in the art to be able to perform the registration step with a server behind a protective firewall by way of any communication without undue experimentation since a firewall conventionally does not allow nodes to communicate with a node behind the firewall and the specification fails to disclose any unconventional, novel, or unobvious method for doing so. Therefore, these claims fail to meet the enablement requirement.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7, 9-15 and 17-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-7, 9-15 and 17-34 recite a target registering with a server behind a firewall and then recites "...downloading the large file from the server through the firewall...by the server receiving a registration at the server behind the firewall". It is unclear whether this newly recited "registration" is an introduction of a new "registration" or whether this recitation refers back to the previously recite "registration".

Claims 19-20 and 29 further recite "registering with the server behind the firewall" in addition to the above shown limitations. It is also unclear whether this recitation refers to either of the two recitations regarding "registration".

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
